

P3 | baseline | Local mechanism candidates versus official development
Pointwise exploratory 95% whole-case intervals; O/L = official development/local case clusters
M: inside practical margin F: screening flag I: insufficient evidence *: min n < 5 x: point only gray band: stated margin

M01: broad_joint / R=mixed / noise=deterministic
M02: smoothed_joint / R=max / noise=deterministic
M03: smoothed_joint / R=min / noise=deterministic
M04: smoothed_joint / R=mixed / noise=correlated
M05: smoothed_joint / R=mixed / noise=deterministic
M06: smoothed_joint / R=mixed / noise=extreme

P3 | baseline | Local mechanism candidates versus official development

Joint station pairs: unavailable in this protocol group

No complete common pre-clear coverage design supplies these comparisons.

Missing observations are not zero and do not establish model compatibility.

M01: broad_joint / R=mixed / noise=deterministic

M02: smoothed_joint / R=max / noise=deterministic

M03: smoothed_joint / R=min / noise=deterministic

M04: smoothed_joint / R=mixed / noise=correlated

M05: smoothed_joint / R=mixed / noise=deterministic

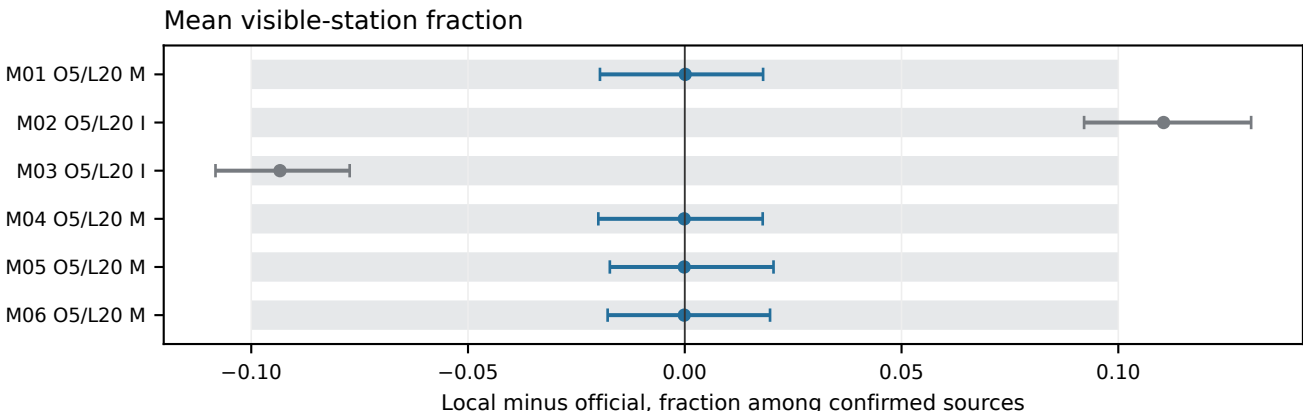

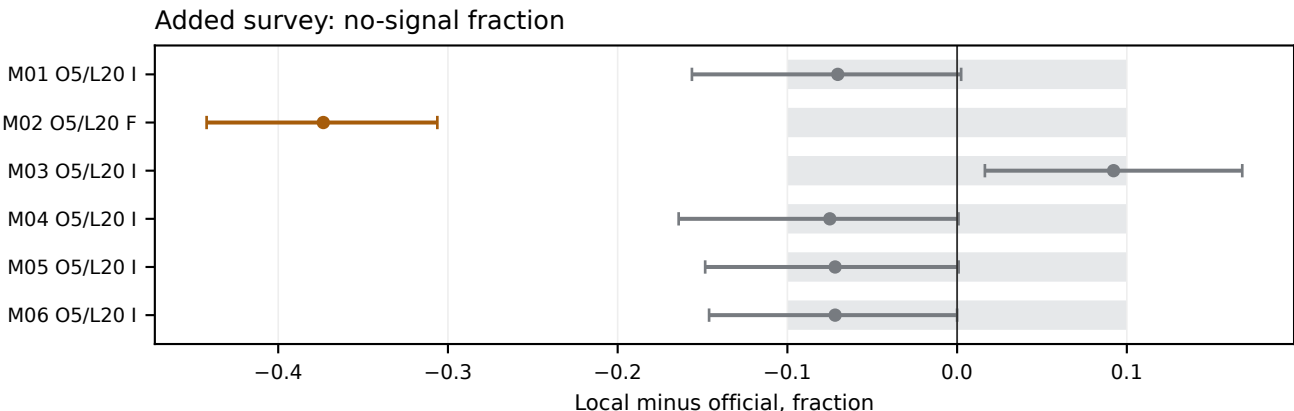

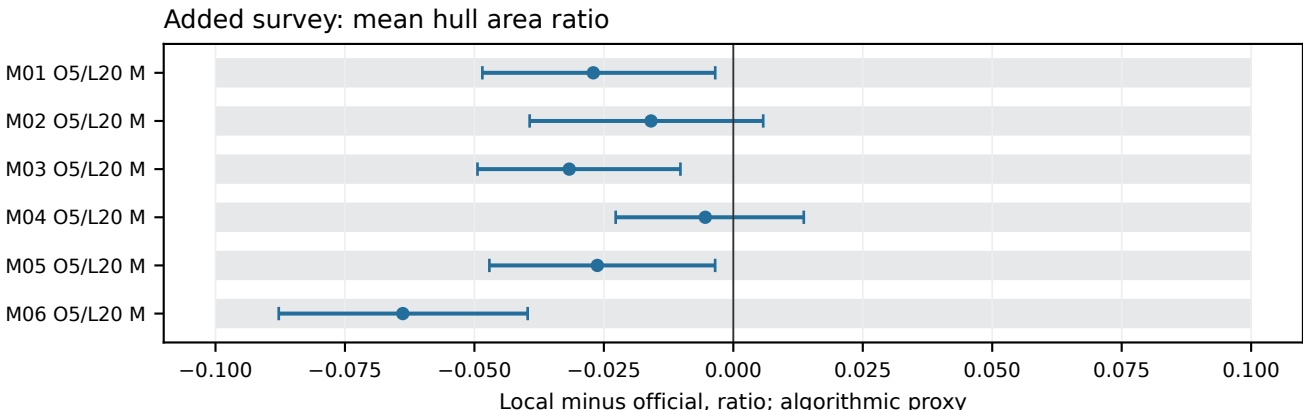

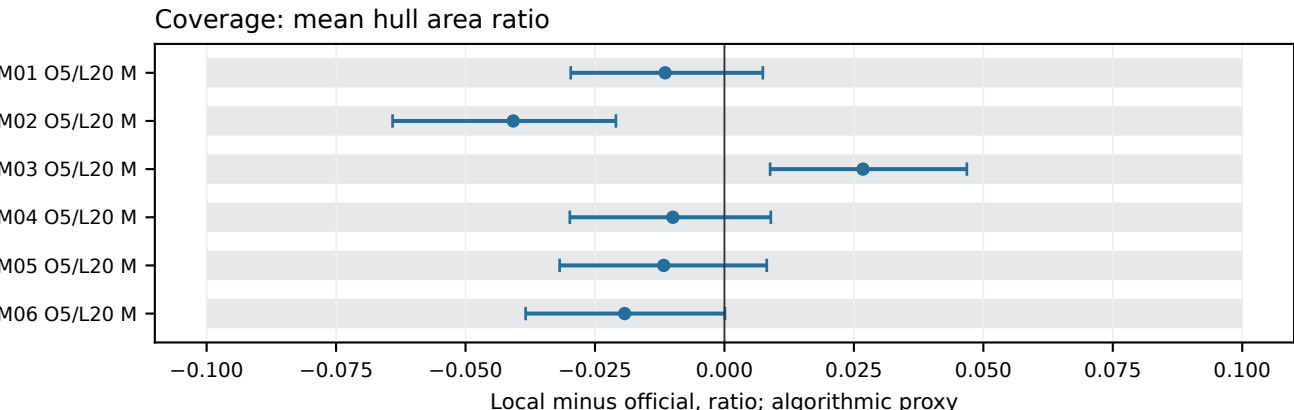

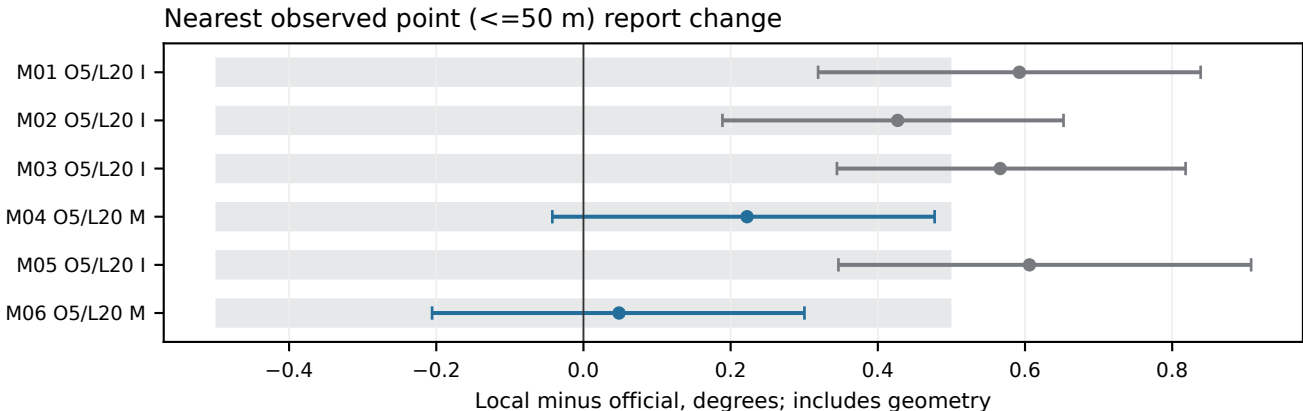

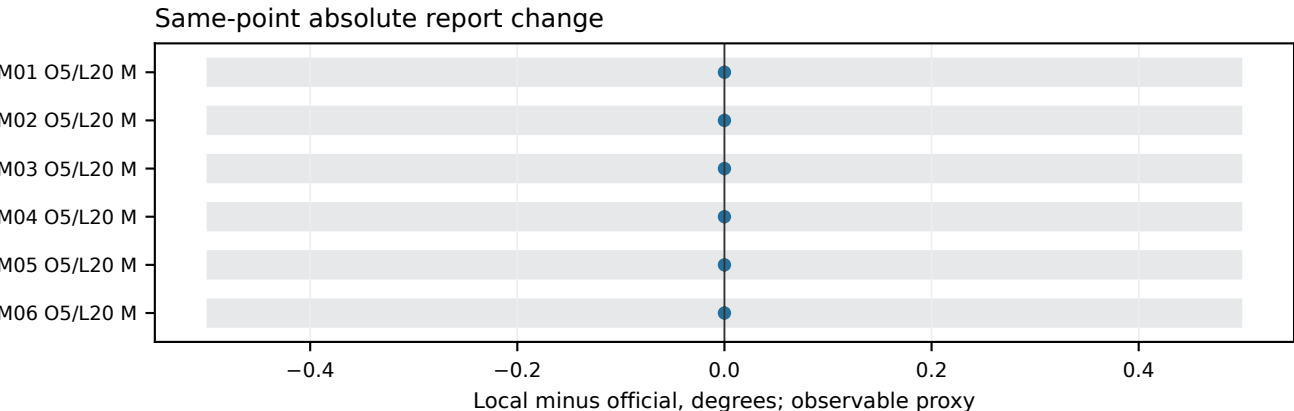

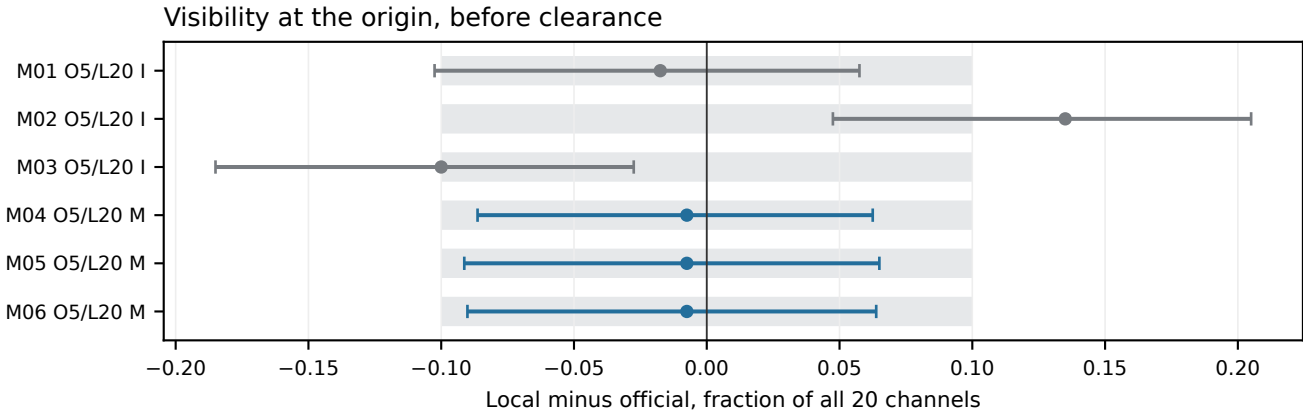

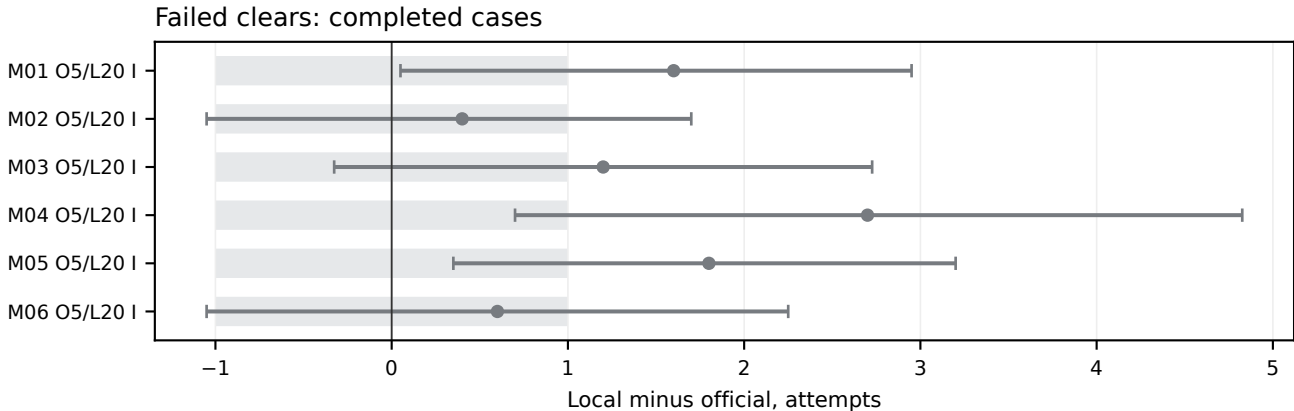

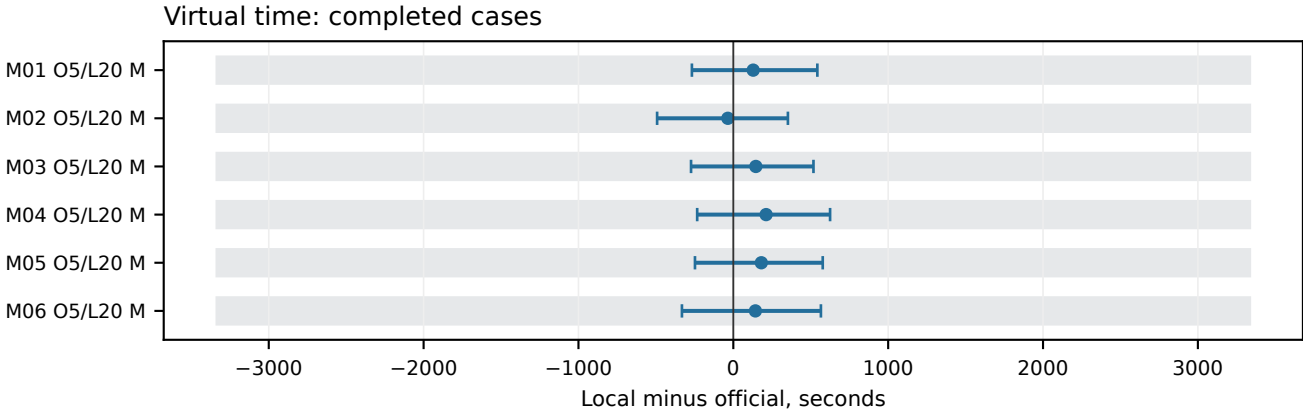

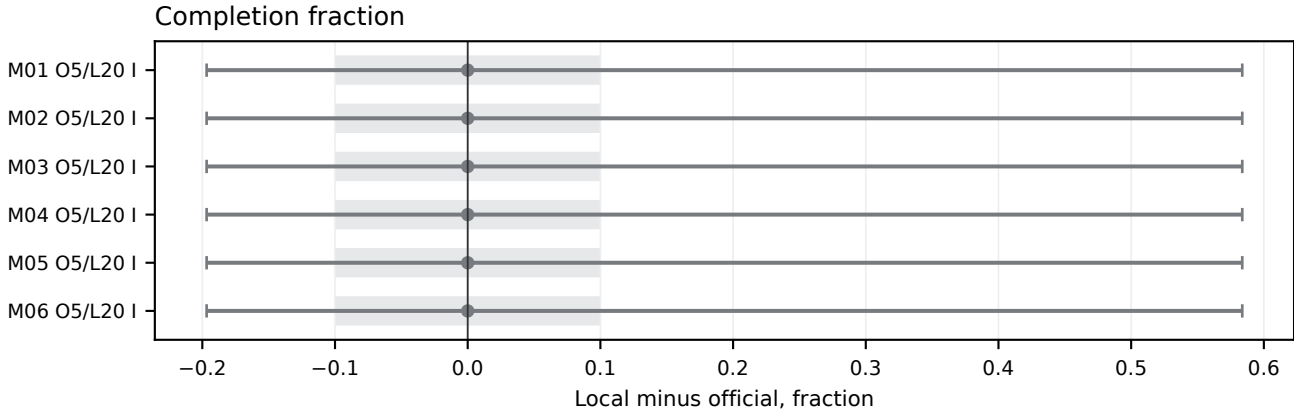

M06: smoothed_joint / R=mixed / noise=extreme

P3 | baseline | Local mechanism candidates versus official development

Joint visible-count distribution: unavailable in this protocol group
No complete common pre-clear coverage design supplies these comparisons.
Missing observations are not zero and do not establish model compatibility.
